As the resignation from Mitsubishi Metal Corporation occurred around 40 years ago, it is inconceivable that he will be influenced by Mitsubishi Materials Corporation, and he can be expected to carry out auditing and supervision appropriately as a Director who is an Audit and Supervisory Committee Member (Outside Director) of the Company, from an independent and objective standpoint. Furthermore, although the Company has made donations to support research in Waseda University, where he worked as a professor, the amount of donations made in the past three years was 1 million yen each year. Business Report

(From January 1, 2019 to December 31, 2019)

1. Business Progress and Achievement of the Corporate Group

(1) Business activities and results

The market of 300 mm silicon wafers for semiconductors in the consolidated fiscal year under review saw some adjustments in quantity, while demand for use in logic semiconductors recovered in the second half of the year, mainly driven by demand for 5G and data centers.

Meanwhile, demand for wafers for memory weakened due to the continued inventory adjustment of customers.

In addition, demand for small-diameter wafers of 200 mm or less was sluggish as a whole, affected by a slowdown in global economic growth.

In this environment, in line with the SUMCO Vision, the SUMCO Group sought to maintain our strong presence among customers through technology development responding to their needs for leading-edge, distinctive products, while endeavoring also to improve our profitability by optimizing pricing.

As a result of the above, for the consolidated fiscal year under review, the SUMCO Group posted net sales of 299,460 million yen, operating income of 50,636 million yen, and ordinary income of 48,310 million yen. In addition, as a result of posting gain on revision of retirement benefit plan of 917 million yen under extraordinary income, net income attributable to owners of the Parent came to 33,112 million yen.

<SUMCO Vision>

1. World's Best in Technology
2. Deficit-Resistant Even during Economic Downturns
3. Empower Employee Awareness of Profit
4. Competitiveness in Overseas Markets

(2) Status of capital investments

Capital investment for the SUMCO Group executed during the consolidated fiscal year under review totaled 58,811 million yen.

The principal items are attributed to investments in a capacity expansion of 300 mm high-precision wafers for cutting edge semiconductors.

(3) Status of financing

During the consolidated fiscal year under review, the SUMCO Group raised a total of 29,500 million yen through long-term debt from multiple financial institutions as the Group's necessary funds.

(4) Issues to be dealt with

As for current demand for semiconductor wafers, although customers are expected to continue inventory adjustment of those for memory semiconductors, demand of those for logic semiconductors is projected to be solid.

In this environment, the SUMCO Group will continue striving to maintain our strong presence among customers through technology development responding to their needs for leading-edge, distinctive products, and improve profitability through increased productivity, optimized pricing, and cost reduction, continuously in line with the SUMCO Vision.

Regarding capital investments, to fulfill our responsibility of supplying 300 mm high-precision wafers for cutting edge semiconductors, for which the Company has a large market share, we made the investment to increase our production capacity by 110,000 wafers a month as we announced in August 2017. We will implement capital investments as appropriate in line with the Company's share, in a disciplined manner, while fulfilling our responsibility to customers as a supplier and taking into consideration supply and demand forecasts of the wafer market on each occasion and the lead-time required to newly install and increase production facilities.

With regard to polycrystalline silicon, which is the main raw material of silicon wafers, due to abrupt changes in the market, a disparity existed between the demand forecasts upon entering into long-term purchase contracts and the current consumption forecasts. Consequently, we are now holding excess inventories. The inventory balance peaked at the end of fiscal year 2016 and has begun to decline, and it is expected to recover to an appropriate level in the medium to long term. The balance of "raw materials and supplies" including raw material inventories has decreased 3.7 billion yen from the end of the previous fiscal year to 149.4 billion yen.

5. Policy on Determination of Dividends from Surplus, etc.

The Articles of Incorporation of the Company stipulate that except as otherwise provided by laws and regulations, the Company may determine, by a resolution of the Board of Directors, the matters stipulated in each Item of Article 459, Paragraph 1 of the Companies Act including dividends from surplus and acquisition of the Company's own shares, etc. The Company considers that returning appropriate profits to its shareholders is an important management priority. As for dividends, the Company intends to provide returns to its shareholders flexibly and proactively, with due consideration to the level of profit, the outlook for subsequent business years, fund requirements for capital investment, etc., the status of internal reserves, and other factors in each business year.

With improvement in the financial position, the Group has largely achieved the medium-term financial targets, namely, equity ratio of 50% or higher and gross D/E ratio of 0.5x or below, that were set out at the time of a public offering in 2015. Accordingly, we revised our shareholder return initiatives and decided to commence distribution of an additional 10% in payout ratio by way of repurchase of its own shares, in addition to the existing 30% dividend payout.

In line with the above policy, the year-end dividend was determined to be 10 yen per share by a resolution of the Board of Directors held on February 18, 2020. As a result, the annual payment of

dividends for the business year under review totaled 35 yen per share, combined with the interim dividend of 25 yen per share. In addition, at the Board of Directors meeting held on the same date, the Company resolved to repurchase its own shares during the period from February 19, 2020 to March 24, 2020 up to a maximum quantity and purchase price of 2,180 thousand shares and 3,300 million yen, respectively, as well as to cancel all of the repurchased shares.
